APPENDIX II: FOUR YEAR TREND BY SCHOOL WITH FREE & REDUCED LUNCH (SEPARATED).	
APPENDIX III: SCHOOL PLACEMENT REQUEST (School Selection and Assignment) P-5117	

Introduction

The Report of District Enrollment is prepared annually to provide information regarding the district's compliance with the State's mandate for Montclair to desegregate our schools. Through the School Placement Request (School Selection and Assignment) Policy (P-5117) we work to create balance in each of our schools.

The enrollment report also provides information about the enrollment trends and patterns of the Montclair Public Schools. It draws much of its information from the October 15 enrollment report, which is required by the State of New Jersey. The figures provided in the report become the basis for the state aid received in the following year. Other sources of data in this report are derived from records kept as part of this and other administrative reports and statistics, which are public information and help to outline the enrollment history of the Montclair Public Schools.

This report is available to members of the public at the Montclair Board of Education, 22 Valley Road, Montclair, New Jersey, 07042 and on our website at www.montclair.k12.nj.us.

DISTRICT PROJECTIONS

District Projections – Term Defined

Cohort Survival Ratios (Grades K – 12)

Estimating the enrollment for the district is a complex task and involves many factors. Kindergarten projections are determined by such factors as the number of students born who will enter the public schools, the rate of turnover in real estate, the rate of development in the home market, and the demographic of home buyers in Montclair, as calculated by the State's Center for Health Statistics. For grades 1 – 12, a predictor that is accepted and used in almost all enrollment studies is called the "cohort survival ratio." The cohort survival ratio predicts the number of students per grade by applying the historical ratio of change based upon the number of students in an existing grade as it pushes to the following year. For example 400 third graders in one year become 396 fourth graders, a cohort survival ratio of .99 for that year. By analyzing the historical pattern from five or more previous years, a relatively reliable pattern can be estimated. The State of New Jersey requires that the district project future enrollments and generally uses a five-year cohort for these predictions. The projections for the Cohort Survival Ratios were applied using a comparison of the actual district enrollment figures for 2014-2015 (See page 4). Note: The data does not include students who are in self-contained special education classrooms and out-of-district placements.

**APPENDIX III:
School Placement Request
(School Selection and
Assignment)
P-5117**

SCHOOL PLACEMENT REQUEST (School Selection and Assignment) P-5117

School Placement Request is the means by which parents express educational preferences for their children in magnet schools K through 8 and for those magnet schools which may be developed within a district or town facility.

Overview:

In 1974 Montclair's Plan of Action was modified to provide Freedom of Choice (currently, School Placement Request) for parents. This School Placement Request option was added to the state approved desegregation plan of magnet schools. School Placement Request is a system by which parents may opt to send their children to a school of their preference within the district. These assignments were approved under a set of guidelines which considered among other criteria, special mandated programs, sibling placement, space availability in schools and programs as long as racial and gender balance is not adversely affected.

A School Assignment Task Force, comprised of community members, consultants and district staff was assembled and charged with examining current practices and;

- (1) To consider whether and to what extent Montclair's school integration plan is affected by the Supreme Court ruling in *Parents Involved in Community Schools vs. Seattle* (2007) ("PICS"), which impacted the ability of school districts to solely consider race in student assignment policies;
- (2) To ensure that the MPS school integration program both complies with our state order from the Commissioner of Education to maintain integrated schools, as well as applicable federal and state laws; and
- (3) To ensure that the district meets these goals in a manner consistent with its mission to promote the academic, social and artistic development of students who as a whole will be accountable for their ongoing learning, value initiative and diversity, achieve the requirements of the Common Core State Standards and New Jersey Core Curriculum Content Standards at all grade levels, and are able to contribute meaningfully to the ever-changing global society.

The Board reviewed the recommendations from the Task Force and through this policy directs the Superintendent to modify all school placement request and school assignment procedures (see R-5117) to conform to the following guidelines and which become effective February 1, 2010 for the 2010-2011 school year. The Board believes that this realignment of student placement procedures will more accurately support its overall educational goals for students, especially the desire to provide high quality, integrated public education for every child through a magnet system in which every school represents a strong, diverse and vibrant community of learners which avoids the economic and/or racial isolation of students, and to more accurately support those outcomes outlined in its mission statement and board policies, especially policy "6010 – Goals and Objectives K-12."

Although "Parental Choice" is an important aspect of student assignment, the Board continues to maintain the final legal authority in determining the individual placement of students under its authority in all district jurisdictions.

SCHOOL PLACEMENT REQUEST (School Selection and Assignment) P-5117

Procedures

In furtherance of board goals, the Montclair Board of Education hereby adopts the following student assignment protocols.

1. All areas of the town shall be delineated as belonging to one of three geographic zones containing roughly an equal population (“Zone A,” “Zone B” and “Zone C”), with each residence in town being in one of the zones. The zones shall be determined by reference to five equally weighted factors drawn from the social science literature to be related to aspects of achievement in alignment with district goals.

The five factors are:

- (1) median household income;
- (2) household poverty rate;
- (3) number of free and reduced lunch (FRL) students;
- (4) parental education level; and
- (5) neighborhood racial/ethnic demographics.

With the exception of Free and Reduced Lunch information which will be drawn from the school district’s own database, the data used to determine the zone boundaries will be drawn from the decennial federal census. The borders of the zones thus should be subject to review and potential refinement only following the release of data from each census.

2. Parents of students entering Kindergarten shall submit their ranked preferences among the elementary schools by the dates specified by the administration.
3. The district shall determine, each year, the percentages of entering Kindergarten students, town-wide, who live in, respectively, Zone A, Zone B and Zone C. These will become the “baseline percentages” for “K” which will be used in these procedures.
4. The student assignment process shall consider the following priority placements factors:
 - a. Siblings: entering kindergarteners who have siblings who will be attending an elementary school the following year shall, upon request, be assigned to the same school;
 - b. English as a Second Language (ESL)/English Language Learners (ELL) students: students requiring ESL services shall be assigned to a school that can provide services; and
 - c. Special Education: students receiving certain types of special education or access available at some but not all elementary schools shall be assigned to schools equipped to meet their needs.
5. Next, while honoring parental preferences to the extent possible, the district shall randomly assign the other students up to the remaining spaces determined by the district to be available in a program or school. The assignment will be done in a way that will bring each elementary school’s cohort to within five percentage points of the baseline zone percentages mentioned in step “3” above.

(For example, if the baseline percentage from Zone A in a given year were 20%, then between 15% and 25% of each elementary school’s Kindergarten cohort shall be drawn from Zone A, and similarly with Zones B and C. This provision shall not apply to students asked to repeat Kindergarten, for they will have the right to attend the same school in which they are enrolled, unless their parents request otherwise, in which case their placement shall be made mindful of the zone-balancing goal of this policy.)

6. The District shall also determine, each year, the town-wide gender breakdown of the entering kindergarten cohort (for example, 48% boys and 52% girls), and student assignments shall be made with a goal of each elementary school’s kindergarten cohort being within ten percentage points of the town-wide baselines (continuing the previous example, no school’s kindergarten cohort should be less than 38% or more than 58% boys).

7. Students whose school assignments must be made after the initial district placements have been determined – these being, principally, students whose families move into Montclair later in the year – shall to the maximum possible extent be assigned to schools consistent with the zone-balancing goal of this policy.
8. In granting School Placement Request to middle schools (i.e., in assigning entering sixth graders who elect not to attend the middle school for which their elementary school is the feeder school, student assignments shall be guided when possible by the zone-balancing goal set forth in this policy along with other district procedures and regulation R-5117.

All placements under this policy are determined by program space availability as determined by the administrative staff.

The Superintendent shall review and approve all proposed placements under this policy prior to their implementation, in order to evaluate the impact of the proposed placements on the parameters and goals of this policy.

The Superintendent shall report annually on the success of implementation of this plan, and at intervals deemed appropriate but in no event less frequently than every five years, convene a sub-committee consisting of Montclair constituents to reconsider, in light of intervening local experience and developing social science, the relationship between this policy and the district’s educational goals, with particular attention to the continuing necessity to use race as one of the five co-equal zone-determining criteria, and recommend any modifications deemed appropriate.

In all phases of the process, the Superintendent maintains the right to make assignments based on broader educational and social goals.
